**Subject:** Re: interested in receiving RFP please put on your list

Hello Matt,

I spoke with Kerry yesterday regarding the Gold King project and he informed me that an RFP would be going out soon. I just wanted to introduce myself in case you are not familiar with my work and background. I am a former research professor with the University of Nevada, Reno. I have developed several different technologies for treating acid mine drainage. I have also conducted emergency treatment projects in situations very similar to what you are experiencing at Gold King.

I am also very familiar with the site. In 2008, I did a project for the Forest Service and EPA at the Gladstone site where I treated water from the American Tunnel and from Cement Creek. The equipment that we utilized is mobile emergency treatment equipment. We were very effective at treating the AMD. This equipment is efficient and can be run off of a small to medium sized generator. I have this equipment available and can mobilize quickly.

I look forward to seeing the RFP and providing a proposal for this project. Please let me know if you have any questions.

Best Regards,
